We Make Recurring Monthly Payments Possible with Single Initial Verification Tokenization System

A batch key (token) issued within a single initial verification for customers' recurring payments.

Recurring payment utilized industry : Donations, subscriptions, utility bills, membership fees, education fees, mobile bills, and etc.

Provide convenience by allowing customers to sign up for recurring payment once, eliminating the need to pay manually each month

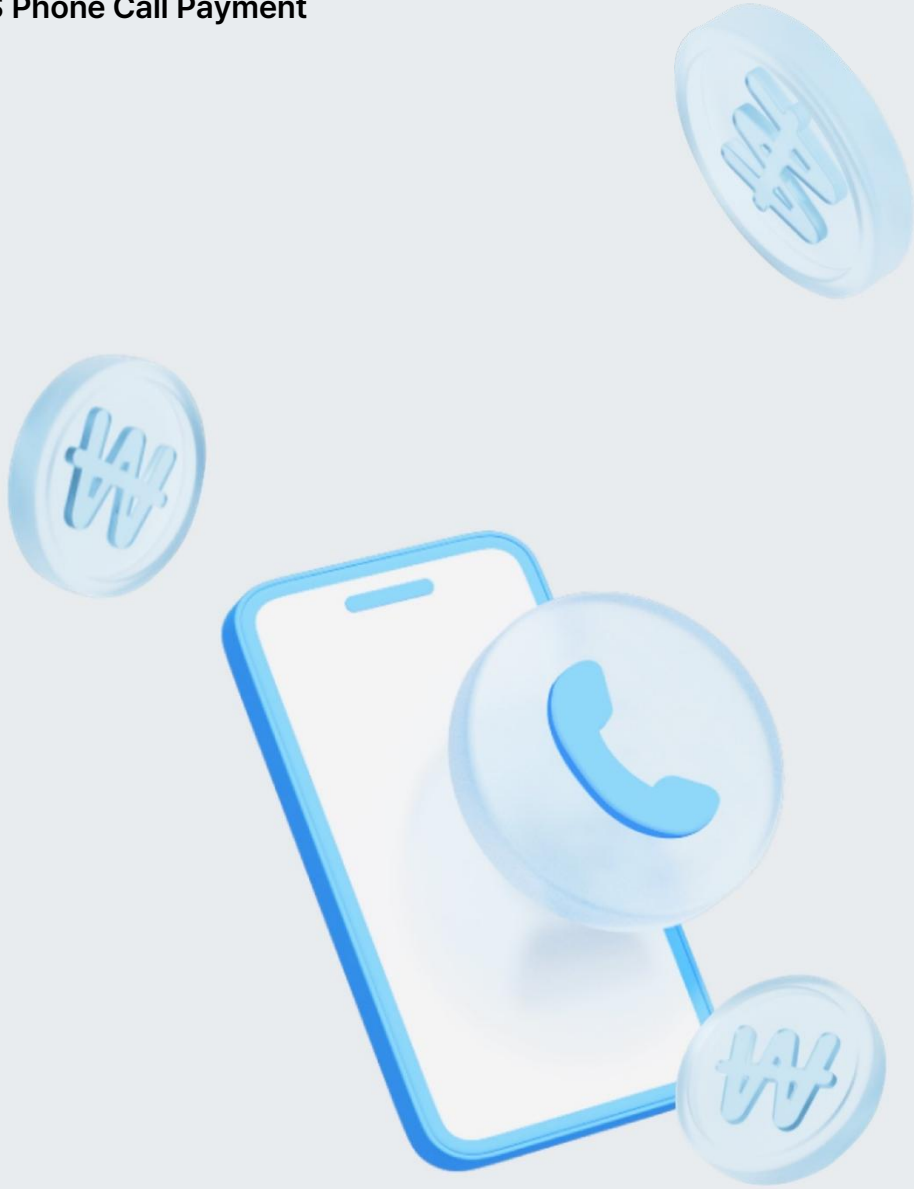

Credit card payments offer higher acceptance rates than traditional direct debit services

Use encrypted authentication keys to protect customer privacy and prevent data leaks

Reduce administrative costs by streamlining tasks through the admin portal

ARS Phone Call Payment Accepts Credit Card and Mobile Payment Simply with a Phone Connection

Utilized Industry for ARS Phone Call Payment

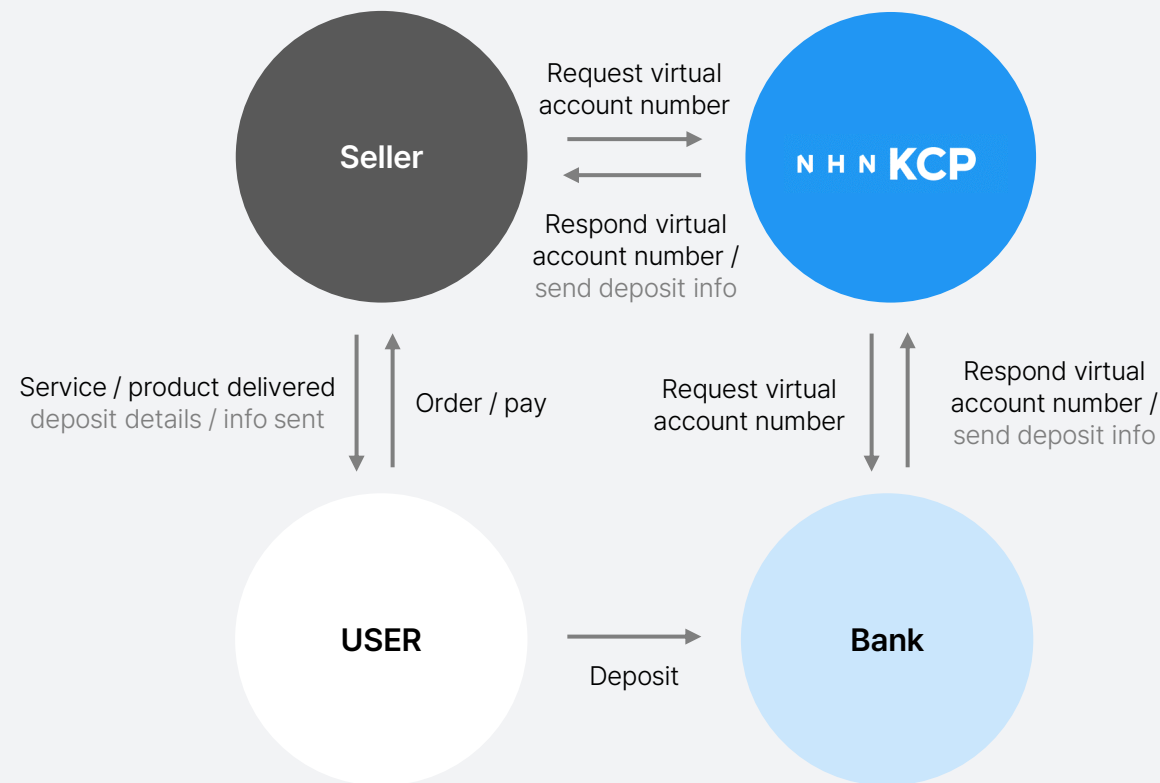

Travel agency, education, delivery, franchise,
online shopping, door-to-door sales, and etc.

Bank Transfers are Offered with Less Processing Fee Compared to Cards!

No complicated contracts or account setup required and no need to manually verify bank transfers. The same secure process used in internet banking is applied, ensuring reliability and convenience.

Maximize Business Efficiency With Virtual Account Service

Reduces time on verification and minimize deposit verification errors caused from mismatched names of depositors as details of deposits (name, amount, and contents) are checked in real-time.

NHN KCP Escrow Service Protects Fulfillments for Both Merchant and Customer

To prevent any fraud and accidents,
KCP will hold onto payments until full transaction is safe to proceed.

Reliable Trade and Transaction For Customers

To prevent fraud, payments are settled after customer receives the order,
and immediately refunded if the item has not been delivered.

Risk Management For Merchants

Ensure safe transactions, guarantee trades to customers,
build trust and confidence with your customers, and
reduce the cost of debt collections

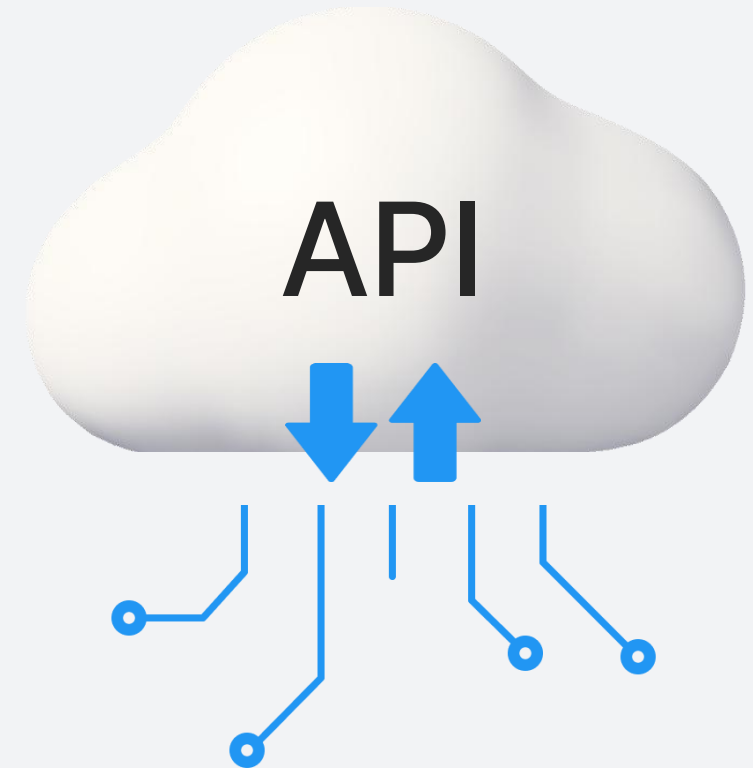

Disbursement Service

For Sub Merchants and Sellers

Global/Local Remittance Service to Settle funds Through API
For Multiple Sub-Merchants/Sellers

- Provide real-time streamlined service for each store
- Provide real-time transfer confirmation and depositor beneficiary name lookup beneficiary names for each participating company
